

Media Requirement Comparison

Recycling reduces the amount of media needed from 181.440 kg., for a representative 12.192 m² project, to only 18.144 kg when using Sponge Media™ abrasive.

Disposal Cost Comparison

A representative 12.192 m² project blasted with Sponge Media™ abrasive generates approximately 20.3 tonnes of waste and costs approximately 16.976 Euro for disposal at 80 Euro per ton (non-hazardous). The same project blasted with conventional abrasive generates approximately 181 tonnes and costs approximately 1.698 Euro for disposal, ten times greater.
